

## V5 tag Mouse Monoclonal Antibody

**Cat. Number:** UM3001  
**For Research Only**

### Description:

<b>Synonyms:</b>	V5 tag
<b>Immunogen:</b>	A synthetic peptide GKPIPPLLGLDST coupled to KLH
<b>Specificity:</b>	All specials
<b>Host Species:</b>	mouse
<b>Ig Isotype:</b>	Mouse IgG1
<b>Purification:</b>	Protein A or G purified
<b>Applications:</b>	WB (1: 1000-1: 10000) , IF(1:200)
<b>Band size:</b>	NA

### Formulation and Storage:

<b>Formulation:</b>	Liquid
<b>Storage:</b>	-20°C or lower

### Background

Anti V5-tag mouse mAb is the excellent antibody in the research. V5-tag antibody can be helpful in detecting the recombinant proteins, some of which include transmembrane and secreted proteins fusion protein. Anti V5-tag antibody can recognize C-terminus, internal, and N-terminus V5-tagged proteins.
